

NOW THERE'S A PLOW FOR WHERE YOU LIVE AND WHAT YOU DRIVE

If you've got a lot of driveway, a lot of snow, and just a little time, you probably wish there was a better way to clear your drive.

Plow It Yourself!

HomePlow™ by Meyer brings you the better way. The HomePlow is an easy-to-use, hardworking plow engineered for SUVs and light pickups.

The Auto-Angle Advantage

Auto-Angling™ is a patented system that allows the plow blade to move left or right without the use of a power unit. For example, if the snow drift is heavier on the left side, the blade will automatically angle left. This gives you full plow-angling functionality without having to leave your vehicle at an affordable price.

P-I-Y

PLOW IT YOURSELF START PLOWING IN 3 EASY STEPS

See if there's a HomePlow for your vehicle.

The HomePlow

18513 Euclid Ave. / Cleveland, Ohio 44112

HomePlow reserves the right under its continuing product improvement program to change construction or design details and specifications without incurring any obligation.

Now with wireless control.

1. STEP ONE: EASY TO MOUNT

**Comes pre-assembled.
Simply mount to your vehicle,
connect the wire harness and
you're ready to plow.**

The HomePlow connects with Quick-Link™: An easy-to-use mounting system that slides into a Class 3, 2-inch front receiver hitch. Once the receiver hitch is installed, Quick-Link lets you attach or detach the HomePlow in under a minute with no tools. So you can clear your drive and get on your way, right away. When the plow is detached, there is no visible hardware on your vehicle.

Quick-Link™:
An easy-to-use mounting system that slides into a Class 3, 2-inch front receiver hitch.*

2. STEP TWO: EASY TO USE

Models available.

Electrically-Powered Lift with Wireless Control & Auto-Angle™

The up/down motion of the moldboard is controlled by an electric power unit that is activated by a wireless key fob. The right/left motion of the plow is controlled by the HomePlow's patented Auto-Angling™ system. Unlike other snowplows, there is no need to manually adjust the blade.

Part #24000 (6'8")

Hydraulically-Powered Lift with Both Wireless And Wired Controllers & Auto-Angle™

Slightly faster than the electric motor version, this power option controls the up/down motion of the moldboard with a hydraulic power unit that is activated by an in-cab controller. The right/left motion of the plow is controlled by the HomePlow's patented Auto-Angling™ system. Unlike other snowplows, there is no need to manually adjust the blade. To accommodate your preference, included with this model are both the wireless and hard-wired controllers.

Part #25000 (6'8")

Full Hydraulic Power

For people who want full remote control of all functions, this hydraulically operated version of the HomePlow is controlled by a hydraulic power unit that directs both the up/down and right/left motion of the blade. With full power control, the driver can move the blade in the desired direction with just a push of a button. This popular version of the HomePlow is the most like a traditional commercial snowplow.

Part #26000 (6'8")
#26500 (7'6")

Auto-Angling™ Blade Movement (See back panel for details.)

It even works in reverse!

3. STEP THREE: EASY TO STORE

You can detach the HomePlow in less than a minute, and the caster wheels make it easy to roll it to wherever you want to store it when it's not in use.

HomePlow Specs

Width: **6'8" or 7'6"**
Height: **22 Inches**
Steel: **14 Gauge**
Weight: **241 Pounds (6'8" Models)**
or
270 Pounds (7'6" Model)
